TECHNICAL DATA

MA – B60

COMPOSITION : Mixture of light coloured hydrocarbon resins.

PROPERTIES

TYPICAL

Appearance	Yellow Pastilles
Specific Gravity, g/cm ³	0.97
Ash Content, %	2.0
Softening Point, °C	100
Storage Stability	At least 2 years under normal conditions.
Packaging	25kg PE bag

APPLICATION

MA-B60 improves the homogeneity of polymer blends of different polarities or viscosities. Rapidly absorbed by polymer matrix as it wets the surfaces which lead to fast incorporation of other compound ingredients. The reductions of compound viscosity will assist further processing, especially milling and calendaring.

MA-B60 is best added at the beginning of the mixing cycle to achieve the optimum wetting effect.

MA-B60 increases green tack of compounds by showing some synergism with tackifying resins.

Due to its light color, **MA-B60** can be recommended for colored as well as black compounds

Recommended Dosage:

2 – 5 phr
