TECHNICAL DATA

MA – F60T

COMPOSITION: *Mixture of Fatty Acids with Zinc Soaps.*

PROPERTIES

TYPICAL

Appearance	Beige Pastilles
Specific Gravity, g/cm ³	1.1
Dropping Point, °C	90
Zinc Content, %	13.5
Storage Stability	At least 2 years under normal conditions. stability.
Packaging	25kg PE bag

APPLICATION

MA-F60T is an additive that improves mixing and processing as well as the incorporation of compounding ingredients.

It is a very effective material for the physical peptisation of NR, improves compound flowbility and carbon black dispersion.

MA-F60T is compatible with most types of elastomers and is quick in reducing compound viscosity, shortens mixing time, reduces energy consumption and improves processing efficiency.

MA-F60T improves calendaring and extrusion rate and provides smooth surface.

MA-F60T also improves reversion resistance and tear strength.

Recommended Dosage:

1 – 5 phr
