TECHNICAL DATA

MA – L16

COMPOSITION : *Mixture of Fatty Acid Soaps and Amides.*

PROPERTIES

TYPICAL

Appearance	Beige Pastilles
Specific Gravity, g/cm ³	0.98
Dropping Point, °C	103
Storage Stability	At least 2 years under normal conditions.
Packaging	25kg PE bag

APPLICATION

MA-L16 is very effective in improving flow properties of rubber compounds. This is due to reduction of intermolecular friction and external friction against metal surfaces.

MA-L16 has a stabilizing effect on the tendency of re-crystallization in CR compounds.

MA-L16 has outstanding release effect during the compounding stage and as a mold release after curing.

For best release effect **MA-L16** is best added during the final mixing stage.

Recommended Dosage:

1 – 5 phr
