**TECHNICAL
DATA****MA – L20****COMPOSITION** : *Fatty Acid Ester Derivatives***PROPERTIES****TYPICAL**

Appearance	White Pastilles
Specific Gravity, g/cm ³	1.1
Ash Content, %	Max 21
Dropping Point, °C	60
Storage Stability	At least 2 years under normal conditions.
Packaging	25kg PE bag

APPLICATION

MA-L20 is a processing additive for most polymers. It shows outstanding performance as a dispersing aid for commonly used fillers in rubber compounding.

MA-L20 also works very well as an internal release agent in injection and transfer molding which prevents sticking of compounds to rolls and rotors.

MA-L20 does not adversely interfere with most curing systems. Due to its low dosage level there is hardly any or no effect on physical properties.

Recommended Dosage:

1 – 5 phr
