TECHNICAL DATA

MA – L25

COMPOSITION : *Fatty Acid Ester Derivatives*

PROPERTIES

TYPICAL

Appearance	White Pastilles
Specific Gravity, g/cm ³	1.15
Ash Content, %	26
Dropping Point, °C	61
Storage Stability	At least 2 years under normal conditions.
Packaging	25kg PE bag

APPLICATION

MA-L25 is a common processing additive for most polymers that improves overall processing properties like flow, dispersion, surface appearance.

In injection and transfer molding, **MA-L25** leads to faster mold filling due to internal lubrication and also improve mold release.

MA-L25 works also very well as an internal release agent which prevents sticking of compounds to rolls and rotors.

MA-L25 does not adversely interfere with most curing systems. At recommended dosage levels there is hardly any or no effect on physical properties.

Recommended Dosage:

1 – 5 phr
